

Big Money Wheel - Rules

The player bets on any number that they want and the wheel is spun. The Wheel will stop and the indicator will show the "winning number", with all other numbers losing.

For example if the Wheel stopped on "5", anyone betting on the 5 would be paid "5 times their original bet"; i.e., with one chip bet, the winner gets paid back 6 chips, that is their own chip plus 5 more, for total of 6.

If 20 was the number bet on the and it is the winning number, and the bettor had one chip bet, they would the get back 21 chips.

If the "flag" or the "Joker" are bet and the are winning number, anyone betting on them would be back 35 to 1 on their bet.

Numbers 1 through 6 are represented as dice on the Wheel. Players bet on as many numbers as they wish.

Dealer spins the Wheel after all the bets have been placed. If a number a Player bets turns up on the Wheel, the Player wins.

The odds are even money if a number shows up once on the Wheel. The odds are 2 to 1 if doubles of a number shows up on the Wheel.

The odds are 3 to 1 if a triple of a number shows up on the Wheel.
